a
entropy collapse
$m = 1 - S_{\text{final}}$
validation accuracy
order parameter m
validation accuracy
learning rate η
b
seed-to-seed susceptibility
peak at $\eta = 0.035$
$\text{Var}_{\text{seed}}(S_{\text{final}})$
learning rate η
c
seed spread at the transition
std=0.106
std=0.189
final m per seed
$\eta = 0.030$
$\eta = 0.035$
